SIGNATURE COURSES

SPRING SEMESTER

INTL 2100 Model U.N.
Studies the structure, operations, and politics of the United Nations. Attention will focus on current U.N. issues, and students will be required to participate in classroom simulations. Students will attend the WebMUN Model U.N., representing a country as U.N. delegates. May be repeated once. Cross-listed with POLT 2100.

Class excursions may include a visit to the United States Embassy, the Peace Palace, or the Humanity Hub, all located in the Hague.

Trip/Activity Fee 50USD

BIOL 1040 Human Genetics
In this course, students will develop a deep understanding of the mechanisms of heredity and variation. They will be able to apply this knowledge to real-world scenarios and relate Mendel’s original principles to our current understanding of the process of meiosis. Furthermore, students will gain insight into how gene products, in conjunction with environmental factors, influence phenotypes and regulate life processes. Additionally, the course will enable students to critically analyze the ethical implications of genetic manipulation in humans and other species, encouraging them to assess their own ethical values and apply perspectives to discussions concerning ethical issues in human genetics.

Introduces DNA, along with the structure and function of human chromosomes and how hereditary traits are passed on. Emphasis on new findings and technologies. Intended for non-majors. GCP Coding: (PNW) (ETH) Leiden Laboratory included.

Class excursions may include Corpus, Through the Human Body and Naturalis Biodiversity Center in Leiden.

Trip/Activity Fee 50USD

courses are subject to change
SPRING I

PSYC 3525 Memory
This course introduces the characteristics of human memory and explores theories explaining its mechanisms and failures. Students will examine the neuroscience of memory as well as the many proposed types of memory: sensory, short-term, working, long-term, episodic, semantic, and autobiographical. We will also discuss the relationships between memory and reality, memory and development, as well as memory and amnesia. Through an integration of readings, lectures, discussions, and interactive demonstrations, students will experience the state of the art on memory within the context of both animal and human research. Major topics include habituation, the physiological bases of learning and memory, classical and instrumental conditioning, information processing, short- and long-term memory, concept learning, explicit and implicit learning, and individual differences in learning and memory. Prerequisite: PSYC 1100 or permission of the instructor.

Opportunity to attend the International Conference on Cognitive Neuroscience, February 08-09, 2025, and a visit to the Corpus, Through the Human Body and The Naturalis Biodiversity Center. AMSTERDAM, LEIDEN
Trip/Activity Fee 50USD

ANSO 2060 Culture and Communication
Begins with the concept of culture as a means of communicating with others; not only through language but with manners, etiquette, dress, rituals and ceremonials, gesture and movement — the entire system of symbols and signs that provide meaning for human behavior. Explores a variety of issues in cross-cultural communication, language use, and symbolic systems. GCP Coding: (ROC) (INTC).
Students may take a tour of the Leiden Wall Poem project, over 100 poems painted on exterior wall of buildings.

POLT 3310 Conduct of Foreign Policy
This course examines the major foreign policy objectives of selected states in the international system and analyzes the domestic forces, institutions, and processes, as well as the historical context, of these states’ foreign policies. The focus will be on foreign policy in comparative perspective. Taught by former senior diplomat with bilateral and multilateral experiences, this course will offer an insight into the practice of conduct as well as the making of foreign policy. The course will discuss a selection of states in various regions of the world. Each case will be discussed in the historical context of the country’s foreign policy, external factors, internal factors, the way these factors play out in examples of contemporary foreign policy issues.
Prerequisite: INTL 1050 or POLT 1050.
Course may include field trips to the International Criminal Court and the International Criminal Court of Justice located in the Hague.
SPRING II

KEYS 4017 Pedal Power
This course explores the fascinating evolution of cycling culture in the Netherlands, encompassing the impact of urban planning and the development of bicycle infrastructure on the nation’s present cycling ethos.

Some of the questions we will address in this class include:
- How did we acquire our current biking culture in the Netherlands?
- What are the various benefits of biking to mind, body, and sustainability?
- Bicycle Debates: To helmet, or not to helmet. E-bikes welcome?

Class guest lectures may include experts from the industry on supply chain problems, marketing, and product strategy. Students will organize a cycling event to a local hotspot such as the nearby beaches of Katwijk or The Hague.

Trip/Activity Fee 50USD

HIST 2090 Encounters with History
This course introduces students to the origins of—and contemporary debate surrounding—colonial studies. Students will delve into the origins and history of colonial ideologies and analyze the political and cultural implications of the colonial legacy across developing nations. This academic endeavor promises to shed light on crucial aspects of colonialism and its enduring effects on modern society.

GCP Coding: (ROC) (OCOM)

The students will be able to visualize the concepts related to colonialism through a guided visit to the World Museum in Amsterdam and Guest lectures on topics such as repatriation of artifacts to former colonies.

Trip/Activity Fee 50USD

PSYC 4000 Advanced Topics in Psychology: Criminology
This course is focused on understanding the history of forensics and the use of science to solve crimes, as well as gaining insight into the psychological development of criminals. Additionally, the project aims to explain the motives of crime and apply crime-scene analysis and criminal profiling to real-life cases. This academic pursuit will provide a comprehensive understanding of the complexities of criminal behavior and investigative techniques used in law enforcement.

Course may include field trips to the International Criminal Court and the International Criminal Court of Justice located in the Hague.

POLT 4350 Advanced Studies in Judicial Politics
Designed for in-depth study of a specific area or issue in psychology. Topics vary each semester. May be repeated for credit if content differs. Prerequisite: PSYC 1100 or permission of the instructor.

Examines the role of “unspoken dialogue” in human interaction and the influence nonverbal behavior has on interpersonal communication. The course focuses on how nonverbal concepts like physical appearance, gestures, movement, and facial expressions underscore the “spoken dialogue.”

Students may visit the Hague Peace Palace or the Criminal Court of Justice. THE HAGUE
